

# Error and Warning Examples

Test files demonstrating mdforge's error handling.

## Warnings (conversion continues)

| File                     | Trigger                       | Expected Output  |
|--------------------------|-------------------------------|--|
| 01-missing-stylesheet.md | Non-existent stylesheet path  | Stylesheet not found:<br>... /does-not-exist.css                 |
| 02-invalid-config.md     | Invalid config options        | Configuration errors: with each invalid option listed            |
| 05-unknown-font.md       | Fonts not on system or Google | Failed to fetch fonts " ... " from Google Fonts: 400 Bad Request |

## Errors (conversion fails)

| File                  | Trigger                    | Expected Error  |
|-----------------------|----------------------------|---|
| 03-missing-include.md | @include with missing file | Include error: Include file not found: ...                              |
| 04-unknown-theme.md   | Invalid theme name         | Unknown theme "...". Available themes: beryl, tufte, buttondown, pandoc |

# Running Tests

```
cd examples/99-errors-and-warnings
```

```
# Warnings - these complete with warnings shown
```

```
mdforge 01-missing-stylesheet.md -o /tmp/test.pdf
```

```
mdforge 02-invalid-config.md -o /tmp/test.pdf
```

```
mdforge 05-unknown-font.md -o /tmp/test.pdf
```

```
# Errors - these fail with clear error messages
```

```
mdforge 03-missing-include.md -o /tmp/test.pdf
```

```
mdforge 04-unknown-theme.md -o /tmp/test.pdf
```
