

Error and Warning Examples

Test files demonstrating mdforge's error handling.

Warnings (conversion continues)

File	Trigger	Expected Output
<code>01-missing-stylesheet.md</code>	Non-existent stylesheet path	<code>Stylesheet not found: ... /does-not-exist.css</code>
<code>02-invalid-config.md</code>	Invalid config options	<code>Configuration errors: with each invalid option listed</code>
<code>05-unknown-font.md</code>	Fonts not on system or Google	<code>Failed to fetch fonts "..." from Google Fonts: 400 Bad Request</code>

Errors (conversion fails)

File	Trigger	Expected Error
<code>03-missing-include.md</code>	<code>@include</code> with missing file	<code>Include error: Include file not found: ...</code>
<code>04-unknown-theme.md</code>	Invalid theme name	<code>Unknown theme "...". Available themes: beryl, tufte, buttondown, pandoc</code>

Running Tests

```
cd examples/99-errors-and-warnings

# Warnings - these complete with warnings shown
mdforge 01-missing-stylesheet.md -o /tmp/test.pdf
mdforge 02-invalid-config.md -o /tmp/test.pdf
mdforge 05-unknown-font.md -o /tmp/test.pdf

# Errors - these fail with clear error messages
mdforge 03-missing-include.md -o /tmp/test.pdf
mdforge 04-unknown-theme.md -o /tmp/test.pdf
```
