

Project Proposal

Acme Corporation 123 Business Street, Tech City, TC 12345 contact@acme.example.com | www.acme.example.com

Executive Summary

This document demonstrates the `@include` directive, which lets you reuse content across multiple documents.

How It Works

Use `@include` followed by a path:

```
@include ./shared/header.md  
@include /absolute/path/to/file.md  
@include "path with spaces/file.md"
```

Paths can be:

- **Relative** to the current file: `./shared/header.md`
- **Absolute**: `/home/user/templates/footer.md`
- **Quoted** for paths with spaces: `"My Templates/header.md"`

Benefits

- Keep shared content in one place
- Update once, reflect everywhere
- Cleaner, more maintainable documents
- Includes can be nested (files can include other files)

Conclusion

The `@include` directive is perfect for:

- Company letterheads

- Legal disclaimers
 - Standard sections
 - Shared definitions
-
