Admonitions

mdforge supports Python-Markdown style admonitions for callout boxes.

Basic Syntax

```
!!! note
    This is a note admonition.
    Content must be indented with 4 spaces or a tab.
```

Admonition Types

Note

Note - General information or remarks.

Tip

Tip - Helpful suggestions or best practices.

Info

Info - Additional context or background.

Warning

Warning - Important cautions to be aware of.

Danger

Danger - Critical warnings about potential problems.

> **Important**
>
> **Important** - Key information that shouldn't be missed.

> **Success**
>
> **Success** - Positive outcomes or confirmations.

> **Failure**
>
> **Failure** - Error conditions or things that went wrong.

> **Bug**
>
> **Bug** - Known issues or defects.

> **Example**
>
> **Example** - Sample code or demonstrations.

> **Quote**
>
> **Quote** - Citations or referenced material.

> **Question**
>
> **Question** - FAQs or things to consider.

Custom Titles

Override the default title with quoted text:

> **Watch Out!**

> You can provide a custom title in quotes after the type.

> **Did You Know?**
>
> Custom titles let you be more specific about the content.

No Title

Use empty quotes for no title:

> This admonition has no title bar, just the colored content area.

Rich Content

Admonitions support full markdown inside:

> **Formatting Works**
>
> You can use **bold**, *italic*, and `code` inside admonitions.
>
> - Bullet lists work
> - Multiple items too
>
> ```
> # Even code blocks!
> print("Hello from an admonition")
> ```

Practical Examples

> **Before You Begin**
>
> Make sure you have backed up your data before proceeding with the installation.

Pro Tip

Use `Ctrl+Shift+P` to open the command palette quickly.

Compatibility

This feature requires version 2.0 or higher.
